Education

University of Engineering and Technology, Lahore — Lahore, Pakistan
Bachelor of Science in Artificial Intelligence | CGPA: 3.30/4.00 — *2025 – 2029*

Forman Christian College — Lahore, Pakistan
Intermediate in Computer Science (ICS) — *2022 – 2024*

Projects

News NLP Pipeline | *Python, spaCy, BERTopic, Transformers, Streamlit, SQLite* | GitHub | Live Demo — May 2026

- Built an NLP pipeline for approximately 350,000 Dawn News headlines and excerpts spanning 15 years.
- Extracted over 420,000 named-entity mentions using spaCy to support analysis of people, organizations, and locations.
- Applied BERTopic to discover 20 topics and developed an interactive Streamlit dashboard for exploring topics, sentiment, and entity mentions.

Himalayan Wildlife Classifier | *Python, PyTorch, ResNet18, Streamlit* | GitHub | Live Demo — July 2026

- Developed an image classifier for Snow Leopards, Markhors, and Himalayan Brown Bears using a dataset of 819 images.
- Used a pretrained ResNet18 with a frozen backbone for transfer learning and achieved 96.55% validation accuracy.
- Deployed an interactive Streamlit application with an 80% confidence threshold and an "Other" prediction for low-confidence inputs.

wmus (Terminal Music Player) | *Python, windows-curses, Pygame, PyInstaller, Inno Setup* | GitHub — June 2026

- Created a keyboard-driven Windows terminal music player inspired by cmus, with a custom text-based interface.
- Implemented fuzzy track search and metadata caching, optimizing local music library navigation and retrieval.
- Packaged the application for Windows using PyInstaller and Inno Setup.

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, SQL, Bash
Libraries and Frameworks: PyTorch, Transformers, spaCy, scikit-learn, Pandas, NumPy, Streamlit
Tools and Systems: Git, Linux, SQLite
